RETRO KIT NOW AVAILABLE
ITEM #9427K-RETRO
SECURITY OPTIONS
There are two primary ways to store coins in a self-serve environment: either inside the equipment in a coin box or in a vault that is installed beneath the meter to collect coins. Since vaults are cemented in on all sides, they are very difficult for thieves to break into. JE Adams provides the 2” threaded nipple and vault tube cover for most units (except air/vacs).

VAULT ASSEMBLIES
The vault assembly is to be used in conjunction with the form assembly (sold separately) to create the vault system. These assemblies hold $550 in quarters.

ULTRA ISLAND CANOPIES & BASES
